Department of Computer Science and Engineering

Smart Bangladesh Digital City Network

Work Distribution Among Group Members

Course Code: CSE421

Course Name: Computer Networks

Group Number: Group 01

Submitted by

Name	Student ID
Mohammad Jabir Safa Khandoker	22201108
Md. Saadat Rahman	22201101
Nazah S. Anis	22201105

August 2026

1 Overview

The implementation of the Smart Bangladesh Digital City Network was carried out in six major phases. This document records which of those phases each member of Group 01 worked on.

Table 1: The six major implementation phases

Phase	Name
Phase 1	Design on paper
Phase 2	Build the topology in Packet Tracer
Phase 3	Addressing
Phase 4	DHCP
Phase 5	Routing
Phase 6	Servers and services

Preliminary planning, the backup routing demonstration and the final report were carried out jointly by all three members and are therefore not attributed to any individual.

Table 2: Required setups mapped to members

Member	Name	Required setup configured
Member 1	Mohammad Jabir Safa Khandoker	DHCP, Dynamic Routing
Member 2	Md. Saadat Rahman	Static Routing
Member 3	Nazah S. Anis	Email

2 Mohammad Jabir Safa Khandoker

Student ID: 22201108

Required setup configured: DHCP, Dynamic Routing

Phases worked on:

- Phase 1 — Design on paper
- Phase 2 — Build the topology in Packet Tracer
- Phase 3 — Addressing
- Phase 4 — DHCP
- Phase 6 — Servers and services

3 Md. Saadat Rahman

Student ID: 22201101

Required setup configured: Static Routing

Phases worked on:

- Phase 1 — Design on paper
- Phase 2 — Build the topology in Packet Tracer
- Phase 3 — Addressing
- Phase 5 — Routing

4 Nazah S. Anis

Student ID: 22201105

Required setup configured: Email

Phases worked on:

- Phase 1 — Design on paper
- Phase 2 — Build the topology in Packet Tracer
- Phase 3 — Addressing
- Phase 6 — Servers and services

5 Summary

Table 3: Phases worked on by each member

Phase	Member 1	Member 2	Member 3
Phase 1 — Design on paper	•	•	•
Phase 2 — Build the topology in Packet Tracer	•	•	•
Phase 3 — Addressing	•	•	•
Phase 4 — DHCP	•		
Phase 5 — Routing		•	
Phase 6 — Servers and services	•		•
